Media & Entertainment | North America

The State of Streaming, Advertising, & Entertainment – Our Investment Outlook Ahead

We continue to recommend investors look to areas of highlycontracted revenue streams and areas benefiting from strong consumer demand (OW EDR, FWONK). Streaming stocks have lagged, and we pick our spots here (OW DIS, WMG). Rising macro headwinds keep us largely on the sidelines in advertising.

Key Takeaways

- Top Picks are EDR in US Media & Entertainment and AMZN in US Internet.
- Ad-supported tiers from OW DIS and EW NFLX are ahead, creating new competitors for ad dollars in a slowing albeit still-growing US ad market. We expect accretive unit economics out of the gate. What is less clear is whether ad revenues can create upside to overall revenue expectations for both services.
- Global streaming video net adds continue to slow, down 34% YoY, as companies pivot to prioritize reducing losses over maximizing subscriber growth. Lower content spending at Netflix trims our content spending expectations from a 14% CAGR to a still-robust 12% CAGR ('22E-'25E).
- Fundamentals are most robust in sports rights inflation and the return to live. Consumer demand and spending for experiences from theme parks to concerts remain robust looking into 2H22.
- Linear TV pressures appear to be increasing, with cord cutting reaccelerating and expected to hit 6-7% by YE22.
- Streaming music appears more resilient than streaming video to macro headwinds, and we see accelerating growth in FY23 helping OW-rated WMG re-rate given its discount to UMG.

Netflix and Disney enter ad-supported streaming – what are the investment implications? While 2Q streaming net adds were modestly better than expected, MORGAN STANLEY & CO. LLC

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures. refer to the Disclosure Section, located at the end of this report.

they were still down 34% YoY (see Exhibit 9). Ad-supported tiers should allow Netflix and Disney to continue to drive ARPU without leaning exclusively on consumer price increases and tapping into strong advertiser demand for their audiences.

We remain OW DIS as we see the high-multiple Parks segment driving the majority of EBITDA and FCF over time, while Disney's content assets are underearning and undervalued (see here for more detail). Both Disney and Comcast highlighted continued strong forward demand trends at their US parks just this week. In streaming, investors remain largely skeptical Disney can raise Disney Plus prices while also delivering over 20mm core Disney Plus net adds without the benefit of new market launches. Our response to the pushback would be: 1) Consumers who are not willing to move to the \$10.99/mo ad-free tier in December can stay at \$7.99/mo with a very limited ad load out of the gate, and 2) Disney Plus content amortization is likely to grow from ~\$5bn in FY22 to over \$9bn in FY24. We would expect that the quality of the product will improve as a result of this +35-40% annual CAGR in content amortization over the next two years.

We remain EW NFLX shares as we see a balanced risk/reward, given what we regard as fair valuation (~23 times P/23E EPS) and concerns over net adds achievability in 2023. We continue to assess the potential for a meaningful revenue lift relative to expectations from capturing paid sharing and launching an ad tier. At this point, however, we are not convinced that this opportunity is underappreciated or shares mis-priced. Consensus already expects ARPU to grow MSD for the foreseeable future while net adds are expected to double in '23 vs. '22, all while content spending growth is moderating. Our updated Netflix forecast (July 2022) brings our estimate for industry content spending down from a 14% CAGR to a still-robust but lower 12% through 2025 (see Exhibit 18).

Linear TV ecosystem trends are under growing pressure. Total linear distribution revenues (cable affiliate + retransmission fees) appears to have slowed to 2-3% growth in 2Q22. We remain EW WBD and FOXA as they attempt to navigate these growing linear headwinds, while we are UW PARA given it carries the highest exposure to linear and trades at a premium multiple. We modestly lower long-term estimates on PARA in this note after layering in both the Big Ten and Champions League rights, but there are no change to our risk/reward view.

Across our live entertainment and sports coverage, 2Q trends were strong and stronger than expected (LYV, EDR, MSGS, MSGE, CNK, WWE). Endeavor noted this week that it has already sold out premium packages through its OnLocation business for the 2023 Super Bowl. We update our LYV estimates in this note, with long-term expectations largely unchanged. We remain EW, but the risk/reward has improved with shares lagging post-earnings. We also update our EB estimates following weaker-than-expected 3Q guidance, and lower our PT to \$9.

Continued high levels of sports rights inflation should be a tailwind to our M&E Sector Top Pick OW EDR, OW FWONK, and EW WWE. The Big Ten and Champions League renewals were at ~2.7x and ~2.5 times AAV increases, respectively, which comes after F1 has reported secured an ~16x AAV increase for its US rights with ESPN.

Advertising revenue trends a mixed bag: We saw video ad trends surprise to the downside notably in streaming (UW ROKU, Pluto), while sports (ESPN & FOX) and news (Fox News) delivered growth and growth higher than expected. In audio, ad revenues were lower than expected both in streaming (WMG's exposure through YouTube and Spotify) and broadcast (iHeart). OOH advertising growth of 25% this quarter was ahead driven by Lamar, and we continue to see OOH as a local media share gainer. CCO reiterated its 3Q22 guidance today while 4Q implied guidance was introduce and broadly in-line with expectations.

Bringing it all together – updating the MS ad forecast. We are updating our paid media advertising forecast in this report to reflect post-2Q earnings forecasts, now estimating 7.1% and 8.0% growth in '22 and '23, respectively (ex P&O), up 50 bp and down ~50bp, respectively. Exhibit 29 compares our new forecast to prior.

Online ad trends holding in...durability of consumer remains in focus. As detailed in Are the Online Ad Markets Weakening and Derisked?, recent online ad results were not terrible (Search holding up better than expected), but they were also not great as 60% of companies guided down forward expectations, leaving us inconclusive about a potential trough for '23 growth. More recent ad commentary and industry conversions have been encouraging (August at least stable, if not better than July, and back-to-school spending was solid) as the consumer continues to spend within retail/e-commerce and travel. Part of this may be due to the still-existing excess balance sheets consumers are working their way through, but given results, we now expect ~11% Y/Y '22 online ad growth (1% higher than before, driven by search) and ~10% Y/Y '23 online ad growth (unchanged from our previous aggregate spend estimate).

AMZN is our Internet sector Top Pick Overall and Within Ads. From a stock perspective, we remain highly selective and mindful of timing of outperformance given expectations, and are monitoring macro and micro factors. Our Internet sector Top Pick overall (and Top Pick within Ads) is AMZN (\$175 PT with ~35% upside) given improving retail profitability. AMZN also has a ~\$38bn annual, performance-driven ad business expected to grow at a ~22% '22-'24 rate with CTV and video call optionality. Our \$145 GOOGL PT has ~33% upside, and we feel best about paid Search's resiliency through macro slowing, though we flag that we remain ~1%/3% below Street 2H revenue/EBITDA estimates. On META, our work here details the near-term Reels headwinds that may take multiple quarters to get turned. That said, from a longer-term perspective we remain OW META (\$225 PT has ~40% upside) while flagging we are largely in line in 2H and below the Street in '23.

Investors have been keenly focused on reconciling **agency organic growth of nearly 10% in 2Q22** (see Exhibit 35) with the significant deceleration in ad spending especially in digital (declined ~20% from 1Q to 2Q, see Exhibit 25). We remain UW OMC, although would rank it lower conviction than our other UWs and now see reasonably attractive risk/reward at IPG. Consensus estimates for agency organic growth in '23 is 1-2%, so consensus is baking in a more difficult macro environment although not a global recession.

Our most out-of-consensus recommendation remains OW CNK (see upgrade here), where shares have sold off during the post *Top Gun: Maverick* (PARA), pre-*Black Panther II* (DIS) period. We see shares as offering a highly-compelling risk/reward here as film supply comes back on in force in November and

December. We believe **studios** are **emboldened by this summer's strength** and will bring increased film supply to market in '23 and '24, with CNK shares benefiting. **August industry box office came in modestly ahead of our expectations.**

Investment Outlook

Netflix and Disney enter ad-supported streaming - what are the investment

implications? As the US market heads towards 400mm paid streaming subscriptions by year-end, growth is slowing. While 2Q streaming net adds were modestly better than expected, they were still down 34% YoY (see Exhibit 9). In addition, ARPU growth was broadly below expectations driven by increased bundling discounts, FX headwinds, and ad softness. Ad-supported tiers will allow Netflix and Disney, collectively with over 110mm US subscriptions, to continue to drive ARPU without leaning exclusively on consumer price increases and tapping into strong advertiser demand for their audiences.

Exhibit 2: We continue to see sequential and YoY deceleration in net adds as services mature and markets reopen to live entertainment

Global Streaming Video Paid Net Adds (mm)

Source: Company data, Morgan Stanley Research

We remain OW DIS as we see Parks segment driving the majority of EBITDA and FCF while Disney's content assets are under-earning and undervalued (see here for more detail). Investors remain largely skeptical Disney can raise Disney Plus prices while also delivering over 20mm core Disney Plus net adds without the benefit of new market launches. Our pushback to the pushback would be: 1) Consumers that are not willing to move to \$10.99/mo ad-free tier in December can stay at \$7.99/mo with a very limited ad load out of the gate and 2) Disney Plus content amortization is likely to grow from ~\$5bn in FY22 to over \$9bn in FY24. We would expect that the quality of the product will improve as a result of this +35-40% annual CAGR in content amortization over the next two years.

We remain EW NFLX shares, seeing a balanced risk/reward given valuation (~23 times P/23E EPS) and concerns over net adds achievability. When it comes to a quick revenue lift from launching an advertising tier, we think Netflix is a bit a victim of its own success. This is most evident in the US where Netflix already has more than 60% penetration in broadband HH and earns roughly \$16 of monthly ARPU. Consensus already expects ARPU to grow MSD for the foreseeable future while net adds are expected to double in '23 vs. '22, all while content spending growth is moderating. Our

updated Netflix forecast (July 2022) brings our estimate for industry content spending down from a 14% CAGR to a still-robust but lower 12% through 2025 (see Exhibit 18).

While we see the move into advertising as strategically sound with potentially accretive economics in developed markets like the US (see our analysis here), investors will need to be patient. Depending on how Netflix prices and markets the ad tier, it may take longer than expected to build a large enough ad supported sub to deliver meaningful ad revenues. In addition, the opportunity for Netflix to drive incremental revenue growth from an ad-tier outside the US is far from clear. Structurally lower ad ARPUs introduce a smaller revenue TAM while limiting the ability to lower the consumer price point without sacrificing unit economics. One wild card - any minimum guarantee from Microsoft could benefit near-term revenues in '23 without necessarily representing the underlying unit economics of the business at scale.

Industry implications - Netflix and Disney Plus become new competitors for ad dollars.

Over the next few years, however, both Netflix and Disney should emerge as multibillion ad revenue streams. This will introduce new competition to the broader video ad market. This is roughly a \$110bn US market, growing 8% per year, if we include national, local, linear, and digital video. If we narrow it down to just national linear TV spending excluding digital extensions, this market appears to be down to just \$35 bn and falling (see Exhibit 34). Into these TAMs come Netflix's and Disney's ad-supported tiers.

Linear ecosystem trends likely weaken ahead: The strategic pivot to streaming by traditional TV networks has been nicely revenue accretive but highly earnings dilutive. As the industry pivots once again, this time to try and drive streaming losses to profits, cord-cutting trends appear to be re-accelerating (see Exhibit 3). Total linear distribution revenues (cable affiliate + retransmission fees) appears to have slowed to 2-3% growth in 2Q22. This likely falls further by year-end, as we expect cord-cutting to increase from 5-6% to 6-7%. We think the continued leakage of sports rights out of the bundle is further eroding the value to the consumer.

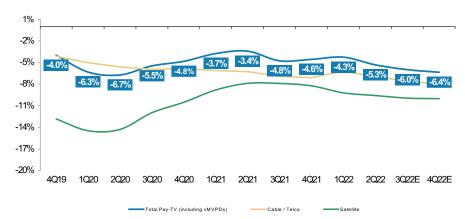

Exhibit 3: We expect the rate of cord-cutting to re-accelerate in 2H22

Source: Company data, Morgan Stanley Research

These trends likely accelerate, with TNF hitting Prime Video this quarter, RSN DTC services now coming to market, Apple bidding away MLS rights, and legacy broadcasters like ESPN and CBS shifting more broadcasts to ESPN Plus and Paramount Plus, as

examples. We remain EW WBD and FOXA as they attempt to navigate these growing linear headwinds, while we are UW PARA given it carries the highest exposure to linear and trades at a premium multiple. We modestly lower long-term estimates on PARA in this note after layering in both the Big Ten and Champions League rights, but there is no change to our risk/reward view.

The value of sports to platforms and consumers continues to stand out, reinforcing our bullish view of sports rights holders, especially given the prospect of a weaker macro ahead. Across our live entertainment and sports coverage, 2Q trends were strong and stronger than expected. This strength came from the consumer and from sponsorship (LYV, EDR, MSGS, MSGE, CNK, WWE). We saw per capita spending up 15-40% in 2Q22 over 2Q19 (see Exhibit 40) across the consumer landscape with the debate over durability as comps turn more difficult in 2H22. We update our LYV estimates in this note, with long-term expectations largely unchanged. We remain EW, but the risk/reward has improved with shares lagging post earnings. We also update our EB estimates following weaker-than-expected 3Q guidance and lower our PT to \$9.

Sponsorship spending on live events may be an underappreciated area of corporate investment in the backdrop of a softening overall ad market (see Spotify's multi-year investment in FC Barcelona as an example).

Finally, we see continued high levels of sports rights inflation with big tech now firmly entrenched as buyers of rights. **This should be a tailwind to our Top Pick OW EDR, OW FWONK, and EW WWE.** The Big Ten and Champions League renewals were at ~2.7x and ~2.5 times AAV increases, respectively, which comes after F1 has reportedly secured an ~16x AAV increase for its US rights with ESPN (see here).

Our most out of consensus recommendation remains OW CNK (see upgrade here), where shares have sold off during the post-*Top Gun: Maverick* (PARA), pre-*Black Panther II* (DIS) period. We see shares as offering a highly compelling risk/reward here as film supply comes back on in force in November and December. We believe **studios are emboldened by this summer's strength** and will bring increased film supply to market in '23 and '24, with CNK shares benefiting. **August industry box office came in modestly ahead of our expectations.**

Advertising revenues are truly a mixed bag, but overall corporate spending trends better than feared. Perhaps the least clear 2Q read came from the ad market, which when combined with the prospect of continued Fed rate hikes makes investing in stocks driven by advertising challenging. Overall, however, we saw video ad trends surprise to the downside notably in streaming (UW ROKU, UW PARA), while sports (ESPN & FOX) and news (Fox News) delivered growth and growth higher than expected.

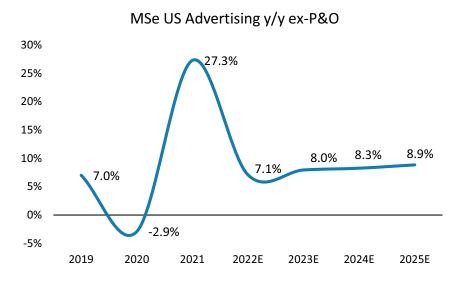

Bringing it all together – updating the MS ad forecast. We are updating our paid media advertising forecast in this report to reflect post 2Q earnings forecasts, now estimating 7.1% and 8.0% growth in '22 and '23, respectively (ex P&O), up 50 bp and down ~50bp, respectively. Exhibit 29 compares our new forecast to prior.

Online ad trends holding in...durability of consumer remains in focus. As detailed in Are the Online Ad Markets Weakening and Derisked?, recent online ad results were not terrible (Search holding up better than expected), but they were also not great as 60%

of companies guided down forward expectations, leaving us inconclusive about potential trough for '23 growth. More recent ad commentary and industry conversions have been encouraging (August at least stable, if not better than July, and back-to-school spending was solid) as the consumer continues to spend within retail/e-commerce and travel. Part of this may be due to the still existing excess balance sheets consumers are working their way through, but given results, we now expect ~11% Y/Y '22 online ad growth (1% higher than before, driven by search) and ~10% Y/Y '23 online ad growth (unchanged from our previous estimate).

Exhibit 4: Excluding political and Olympics US ad spend, we expect '23 y/y growth to accelerate to 8.0%, largely driven by digital display growth

Source: Company data, Morgan Stanley Research

In audio, ad revenues were lower than expected both in streaming (WMG's exposure through YouTube and Spotify) and broadcast radio (iHeart). **OOH** advertising growth of 25% this quarter was ahead driven by Lamar, and we continue to see OOH as a local media share gainer. We remain OW SPOT, although we note that despite being 80%+ subscription revenues, podcast advertising is key to delivering on our thesis. We await the launch of its audio books product later this year.

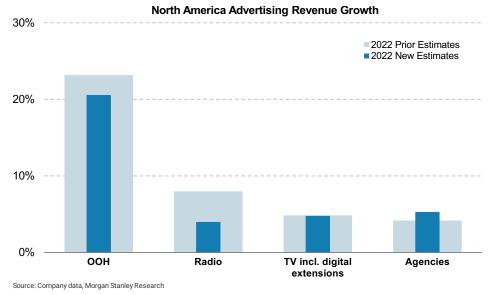

In news, print advertising at NYT saw a strong recovery with the return of luxury and live entertainment spend, but core digital advertising (ex-Athletic) faces continued pressure into 3Q (down mid-to-high single digits for 2Q/3Q). Slower news subscription net adds reflect a shift in focus towards higher ARPU bundle monetization, but we see attractive revenue scale opportunities still ahead.

Investors have been keenly focused on reconciling **agency organic growth of nearly 10% in 2Q22** (see Exhibit 35) with the significant deceleration in ad spending especially in digital (declined ~20% from 1Q to 2Q, see Exhibit 25). We would make three points here: 1) Both agency organic and ad spending growth are slowing, much of the investor focus is relative to expectations, but on an absolute basis the direction is the same, 2) There are clearly more options for advertisers in media and digital media than in prior years, notably TikTok, Amazon, and broader retail media, while at the same time idiosyncratic factors such as privacy changes are further weighing on major public digital platforms, 3) Agencies play in a larger TAM than digital media, notably all of marketing services, while

at the same time do not play in the SMB market that is core to many digital platforms and particularly negatively impacted by the privacy changes noted above.

Exhibit 5: OOH forecasts lower slightly due to a lower transit estimate. Radio comes down, TV remain largely unchanged, and agency growth increases due to higher 2Q results

We remain UW OMC, although would rank it lower conviction than our other UWs and now see reasonable risk/reward at IPG. Consensus estimates for agency organic growth in '23 is 1-2%, so baking in a tougher macro although not a global recession.

AMZN is covered by Brian Nowak.

What's New?

Paramount Global (PARA, UW)

Outlook for PARA shares remains unchanged, lowering EBITDA estimates modestly in '24/'25 on expense pressure from new Big 10 and Champion's League deals and remain

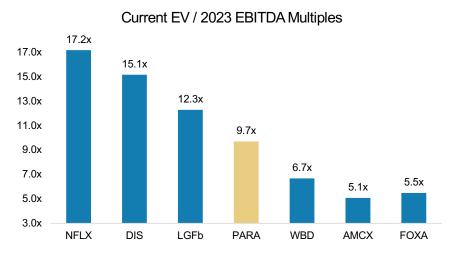

UW: As laid out in our downgrade earlier this year, our UW thesis on PARA shares is predicated on three points:

- 1. The early stage of streaming pivot leads to declining EBITDA and FCF into 2023
- 2. Paramount carries above-peer-average exposure to the linear TV business, where we see distribution revenues declining YoY in 2022, driven by both international network pressure (incl. FX) and the impact of cord-cutting on domestic affiliate revenue
- **3.** While we would not view PARA shares as intrinsically overvalued, on a relative basis shares trade at a premium to peers

None of these factors have changed since July, in our view. While we see the strategic logic to bringing exclusive sports to Paramount Plus in a competitive US streaming market, the impact of layering in the new sports rights agreements only adds pressure to estimated EBITDA growth off of the expected '23 lows. Our linear affiliate revenue outlook remains unchanged. Finally, as seen in Exhibit 6, shares remain at a premium to peers. We remain UW with a \$20 PT (~12% downside).

See below for more detail around our estimate changes.

Exhibit 6: Paramount currently trades at a healthy premium to other traditional media peers, excluding Disney

Source: Company data, Thomson Reuters, Morgan Stanley Research

Paramount has signed a distribution partnership with Walmart: Paramount disclosed in August that Paramount+ will be included as part of the Walmart+ membership program

beginning in September. The ad-supported tier of Paramount+ will be available to Walmart+ members for no additional cost, with Paramount garnering an unknown wholesale rate likely below the headline \$4.99/month cost of the tier. We believe that in order for these members to be reported as Paramount+ subscribers, they will need to opt in by activating the service. Morgan Stanley analyst Simeon Gutman estimates that Walmart+ has approximately 16mm members (see "Walmart+: An Underappreciated Defensive Lever? Membership Grows to 16m"). While our Paramount+ subscriber expectations remain unchanged, we note that this could introduce opportunity for upside to our estimates.

Changes to our estimates: Our overall estimates at Paramount in '22/'23 remain broadly unchanged. Updated estimates reflect the company's new agreements with the Big 10 and Champions League, in addition to the reduction in its ownership of the CW Network through a sale to Nexstar. We incorporate the incremental ad revenue and programming expense related to its two recently announced deals with the Big 10 and Champions League, beginning in 2023 and 2024, respectively.

Is Big Ten football superior to SEC football? The profitability of these deals will be difficult to parse out, given both revenue attribution across advertising and retransmission revenue, as well as across both streaming and linear. For now, we have assumed that on a limited slate at a discounted rate, the earnings impact from its Big 10 deal in 2023 is modest. The limited slate will complement the final year of its SEC deal in '23, with the Big 10 slate expanding in '24 as its SEC deal rolls off, and at which point the full cost of Big 10 comes in. We estimate that the SEC deal has been nicely profitable for Paramount, while we expect direct ad sales will not cover the Big 10 rights fees. As a result, the shift from the SEC to Big Ten in '24 likely puts pressure on earnings, with incremental retransmission fees needed to make the Big 10 contract profitable. Accounting for the new Champion's League deal as well, we assume the new deals drive modestly lower EBITDA in '24/25.

Finally, we update our forecast for the company's reduced stake in the CW subsequent to its sale to Nexstar. As a result, we calculate Paramount's interest will fall from the prior 50/50 JV structure with Warner Bros. to a 12.5% minority interest. Given it has been a loss generator, there are no proceeds from this sale, and therefore no gain/loss. However, we account for the sale through a modest reduction in equity income/loss from affiliates and haircut the cash outflow to account for lower funding contributions.

See Exhibit 58 for a summary of our estimates changes.

What are the terms of the new sports deals? Press reports suggest the new Big 10 deal would come in at a reduced fee in 2023, with CBS carrying only 7 games, but would then step up to an average fee of \$350mm annually from 2024-29 for up to 15 games. We estimate that CBS pays a 25% haircut to our estimated 2024 per game rate to support its transition in coverage given 2023 marks the final year of its SEC agreement. That expense then steps up to just over \$300mm in '24, growing at an estimated 5% escalator. In effect, this drives ~\$100mm of incremental expense in '23, with the full impact in '24.

The new Champion's League deal is reportedly for six years from 2024-29. Press reports suggest the terms of this new deal are for $250 \, \text{mm}$ AAV or $150 \, \text{mm}$ in total over the life of the deal, and would represent more than $2x \, \text{the AAV}$ of the prior deal. Assuming a $50 \, \text{mm}$

escalator over the life of the deal, similar to our Big 10 estimate, implies Paramount pays ~\$220mm in the first year. However, given the season begins in 2024 and continues into 2025, this step-up will be recognized between the two calendar years for Paramount, spreading the impact of the increased expense between 2024-25.

Live Nation (LYV, EW)

We remain EW shares LYV, where we see a strong fundamental growth outlook balanced with a premium valuation and concerns over equity performance as it laps the strong '22 recover year in '23. Results from live entertainment operators in 2Q were healthy across our coverage group. This was led by Live Nation, but also seen at theme parks (DIS), smaller events (EB), and live sports (F1, EDR) all outperforming our expectations. At Live Nation, 2022 is poised for a record year, reflecting the return of concert supply post pandemic and continued strong consumer demand. In addition, company investments in ticketing technology, on-site monetization, and its venue portfolio are contributing.

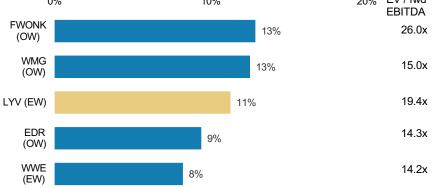

Our hesitancy to get more bullish on shares at this point in the pandemic recovery is based both on LYV's continued premium multiple, robust consensus expectations into '23, and the experience to date of seeing shares outperform during the pandemic recovery and underperform as it laps that recovery the following year. For Live Nation, the recovery is 2022 and the tough comps are 2023.

This is not to suggest we see downside risk to '23 estimates at LYV (we are still modestly above consensus), but simply that the market has more often than not looked to "sell the news" once growth begins to decelerate/normalize. Results in 2Q were supportive, in our view, of the "roaring '20s" thesis regarding pent-up consumer demand, but we also believe that they will not last forever and the greater the macro headwinds in '23, the shorter the cycle.

While we see healthy upside (~20%) in LYV shares following the ~25% drop from highs earlier this year, at 19.5x fwd. EBITDA we see more attractive risk/reward elsewhere in our coverage. Specifically, OW FWONK has more a more contracted revenue base while EDR trades at a significant discount (Exhibit 7). We see LYV shares trading down to ~16x fwd. EBITDA in our \$55 bear case, in which EBITDA grows at an estimated 6-7% CAGR through 2025.

Exhibit 7: Where fundamentals remain robust - live entertainment and sports rights - EBITDA CAGR ('22-'25E) vs. EV/fwd. EBITDA

0% 10% 20% EV / fwd EBITDA

Source: Company data, Morgan Stanley Research; Note: prices as of September 1, 2022 and EV / fwd EBITDA multiples on mid-yr '22; CAGRs represent AOI for LYV, adj. OIBDA for WMG and WWE, and adj. EBITDA for EDR and FWONK.

Raising '22 estimates following the 2Q outperformance. 2Q revenues came in higher

across all three segments at Live Nation in 2Q, with overall revenue nearly 15% above our expectations, led by Concerts. This led to AOI outperformance at Ticketing and Sponsorship, though Concert AOI came in lower than expected. On balance, the outperformance leads us to raise '22 revenue and EBITDA by 6-7% and 3-4%, respectively,

Looking forward, our 2023 AOI remains broadly unchanged for now, however. This may prove to be conservative, but reflects a modestly (~100bp) lower margin outlook at Concerts in '23 vs. our prior estimates in addition to higher corporate costs. Visibility around Concert margins is low, given the difficulty of parsing out the impact from venue mix and contribution from owned and operated venues. Our '23 estimates remain modestly above consensus.

See our earnings note "Demand Exceeds Supply, as 2Q Results and Outlook Outperform" for more on the quarter and Exhibit 53 for a summary of our estimate changes.

Eventbrite (EB, EW)

With shares down ~60% YTD, the risk/reward on Eventbrite has improved, and we see healthy upside from here. However, we are lowering our estimates on 3Q guidance below our expectations, pushing out EBITDA profitability (MS-defined). We lower our PT to \$9 and remain EW as we continue to see a particularly wide range of outcomes for shares.

We continue to see Eventbrite as a well-established brand positioned to benefit from healthy consumer demand for live events and experiences. Our EW ratings reflects an appreciation of these secular tailwinds balanced by uncertainty around its ultimate TAM and its ability to drive enough operating leverage to achieve meaningful profitability in the near to medium-term. While we view investment in tools like Boost as key to driving both improvement over time, it is too early to tell how successful those products will be. For now, a lower revenue outlook leads us to lower long-term estimates, which shifts out our expectation for EBITDA (MS defined) profitability, likely key to shares outperforming. As a result, we lower our PT to \$9, or in line with where shares trade today, and remain EW.

Lack of near-term earnings support creates a wide range of outcomes, in our view, with an opportunity for shares to double in our \$14 bull case but nearly 60% downside to our \$3 bear case.

In our bull case, top-line growth sustains above 30% over the next few years, facilitating EBITDA (MS defined) profitability by '25. That nearer-term profitability outlook increases conviction in the ultimate earnings power of the business, driving multiple expansion to ~4x sales, or closer to that of more proven marketplace Etsy (covered by Lauren Schenk).

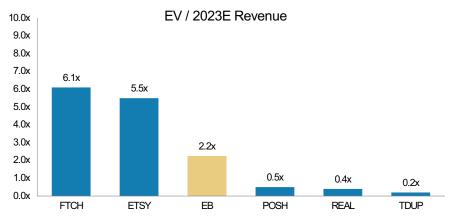

In our bear case, top-line growth is more pressured, growing at a still healthy ~25% over the next few years, but creating a more challenging backdrop in which to drive significant operating leverage. Decreased insight into long-term profitability drives shares to trade down to ~1x fwd. sales, or closer to in line with other marketplace comps (POSH, REAL, TDUP, covered by Lauren Schenk).

Changes to our estimates: Our revenue forecast comes down 3-4% in '22 and ~7% thereafter, as we update for 2Q results but more importantly for a lighter 3Q outlook than expected. Specifically, forward guidance from the company was for revenue of \$65-68mm, compared to our prior estimate of ~\$72mm. This lower revenue outlook carries forward into '23 and thereafter. Lower revenue growth reduces our expectation for operating leverage over the next few years. As a result, our expectation for EBITDA (MS-defined) profitability has been pushed out to '27 (from '25 previously). We continue to forecast that the company can approach its 20% long-term adj. EBITDA guidance.

See Exhibit 47 for a summary of our estimate changes.

Exhibit 8: Eventbrite's valuation falls between online marketplaces such as POSH, REAL, and TDUP and more proven marketplaces like ETSY

Exhibit 16: We expect the rate of cord-cutting to re-accelerate in 2H22

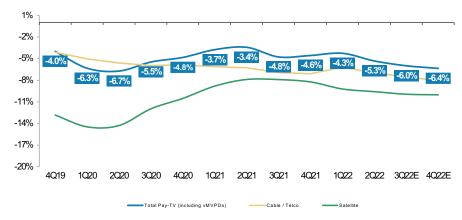

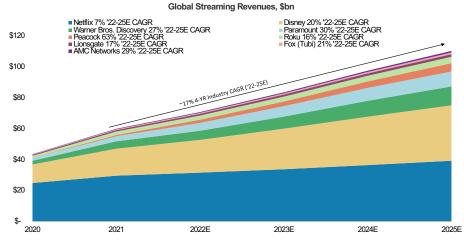

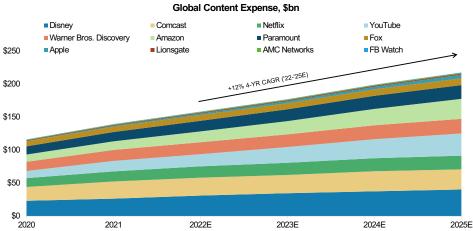

Exhibit 17: Global streaming revenue continues to grow as content drives subscriber adoption

Source: Company data, Morgan Stanley Research. Note: DIS/WBD not adjusted for 2Q22 results

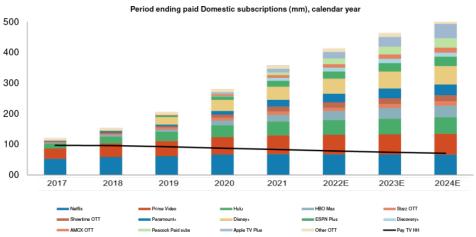

Exhibit 18: A lower outlook at Netflix has led us to forecast a 12% CAGR in content spending growth versus 14% prior

Source: Company data, Morgan Stanley Research. Note: DIS/WBD not adjusted for 2Q22 results

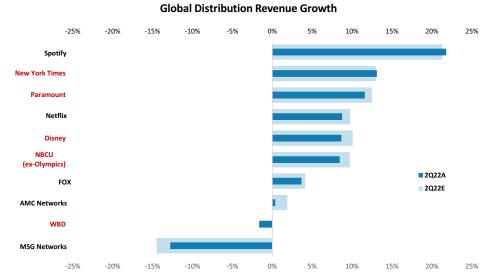

Exhibit 19: We expect roughly 400mm US streaming video subscribers by YE22

Source: Company data, Morgan Stanley Research. WBD/DIS do not include 2Q22 results.

Exhibit 20: Streaming remains a growth market in revenue terms, even for legacy TV operators transitioning to streaming. The debate is over the margin profile of these streaming platforms and the potential for sports to transition successfully.

Source: Company data, Morgan Stanley Research. Note: global distribution revenues reflect linear affiliate and streaming subscription revenues, NBCU excludes Olympics. Companies in red are DTC EBITDA unprofitable, companies in black are profitable

2Q22 Media Advertising and Margin Results

Exhibit 21: While slightly above expectations in aggregate, global video advertising grew modestly YoY in 2Q22, benefiting from continued underlying advertiser demand and in particular strength in live sports at ESPN (DIS) and Fox

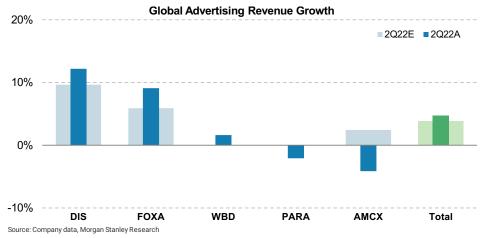

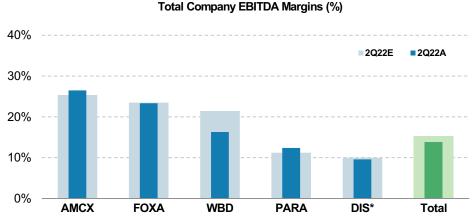

Exhibit 22: Advertising growth has continued to decelerate as the pandemic recovery comps toughen

Source: Company data, Morgan Stanley Research. Note: DIS not adjusted for 53rd week impact on advertising

Exhibit 23: Company margins were modestly ahead of expectations, but ramping streaming content remains primary driver of incremental investments

 $Source: Company \ data, Morgan \ Stanley \ Research. \ Note: Disney \ reflects \ Disney \ Media \ \& \ Entertainment \ Distribution \ segment$

Exhibit 24: In 2Q22, digital advertising saw mixed results relative to expectations, with particularly softer than expected results among streaming advertising services

North America Digital Advertising Revenue Growth (YoY)

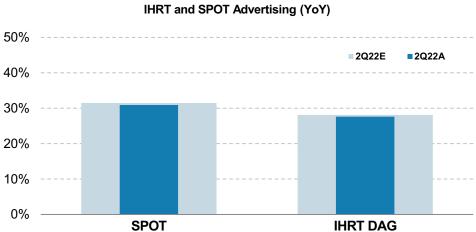

inhibit 25. Digital ad dellare saw a notable deceleration from 10 into 20. primarily due to coffness

Exhibit 25: Digital ad dollars saw a notable deceleration from 1Q into 2Q, primarily due to softness in the ad scatter market. Advertising revenue growth is expected to further moderate into 2H22

Risk Reward - Roku Inc. (ROKU.O)

Valuation / long-term TAM expectations overstated while competition understated

PRICE TARGET \$55.00

Our \$55 Mid-2023 price target is based on ~4x consolidated forward gross profits, or a sumof-the-parts valuation with ~1x forward player revenues and ~2x forward platform revenues. Implied platform multiples reflect a premium to comps given growth level and international optionality.

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

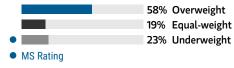

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 08 Sep, 2022. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology here

UNDERWEIGHT THESIS

■ We believe the market is underestimating the competition on Platform active accounts in the US, as well as the time it takes for international expansion to scale. Active account growth has benefited strongly in the US from share gains at TCL, and sustained growth will require additional share gains or major new smart TV partners. ■ We believe the market may be underestimating the ability to monetize strong streaming hours growth long term. Not all hours are equally valuable to Roku, and impressive hours growth reported by Roku is at least in part driven by "cable" TV

Consensus Rating Distribution

hours of long-tail publishers.

viewing benefit from MVPDs that are likely structurally less valuable to Roku than

BULL CASE

\$85.00

BASE CASE

\$55.00

\$35.00

~1x fwd bull player revs, ~3.5x fwd platform sales

Active account adds and daily hours streamed per active account grow faster vs. base case. Active account (AA) additions are higher on average vs. our base case in 22-24E, reaching over 90mm AA by YE2024E from strong international penetration. Platform ARPU reaches roughly \$49 in '24E, with strong core growth offset by int'l mix shift. Player revs are flattish in '22 and then grow low-double digits annually in '23/24E. Total adj. EBITDA margins ramp faster to high single digits by '24E.

~1x fwd player revs, ~2x fwd platform revs

Healthy account and hours growth drive Platform revenues to over \$4bn by 2024E. Global active accounts grow to nearly 69mm by YE2022E and nearly 85mm by YE24E, supported by international. Platform ARPU reaches nearly \$45 in 2024E. Player revenues continue to decline in '22 and grow low-to-mid single digits annually in 23E and 24E. Total adj. EBITDA (excluding stock-based compensation) margins remain low-single digits from '23-25E.

~1x fwd player revs, ~1x fwd platform revs

Active account growth slows, reaching ~68mm by YE2022 and ~80mm by YE24E. Daily time spent per account continues to increase, but growth is slower than our base case, limiting Platform ARPU to approximately \$39 in 2024E. Player revenues decline over the long term. Adj. EBITDA margins remain negative through 2024E.

Risk Reward - Roku Inc. (ROKU.O)

KEY EARNINGS INPUTS

Drivers	2021	2022e	2023e	2024e
Active Accounts	60.1	68.6	78.3	84.9
Platform ARPU (\$)	41.03	42.45	43.33	44.90
Total Hours Streamed (mm) (\$)	73,200	86,420	99,504	113,743
Player Units Sold	15.3	13.9	14.4	14.8
Player ASP (\$, mm)	31	30	29	29

INVESTMENT DRIVERS

We believe the international opportunity will likely take time to scale and build audiences relevant to advertisers in each market, with structurally lower ad ARPU available around the world.

MS ALPHA MODELS

4/5	24 Month	5/5	3 Month
BEST	Horizon	MOST	Horizon

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Ouintile

RISKS TO PT/RATING

RISKS TO UPSIDE

Upside risks: strong user adoption increases scale and leverage against content partners to secure greater advertising-supported content; international expansion can drive incremental advertising.

RISKS TO DOWNSIDE

- New product/feature launches by competitors could pressure Roku's account growth and time spent
- Competitors could announce competing software licensing deals with smart TV manufacturers.

OWNERSHIP POSITIONING

Risk Reward – OUTFRONT MEDIA INC (OUT.N)

Traditional advertising with digital tailwinds

PRICE TARGET \$22.00

Our price target is based on fwd P/AFFO and fwd EV/EBITDA multiples both of \sim 10x and \sim 12.5x, respectively. These multiples are in-line with current fwd multiples and below peer LAMR.

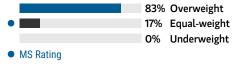

EQUAL-WEIGHT THESIS

- OUT is a pure-play advertising name benefiting from a strong ad market, budget shift to outdoor advertising, favorable market exposure, and a growing digital overlay within their footprint
- Given operating leverage, we see upside to consensus AFFO and dividend growth estimates

BULL CASE

\$33.00 i

\$22.00

BEAR CASE

\$14.00

Implies ~15x EV/fwd EBITDA, ~13x P/fwd AFFO

US growth is better than expected and weathers a macro slowdown in '23, cost-cutting measures provide some margin relief vs. base case: Our bull case assumes 23% PF revenue recovery in the US in as macro conditions remain favorable. Operating leverage drives margin expansion and consolidated adj. OIBDA margin in the high 20%s on average in '22+.

BASE CASE

Implies ~12.5x EV/fwd EBITDA, ~10x P/fwd AFFO

Macro continues to improve in '22 with a macro induced setback in '23: US revenue growth bounces back by ~22% in '22 and ~9% in '23. Transit growth comes back with ~45% growth in '22, with digital and transit driving growth in '22+; adj. OIBDA margin expands in '22 and '23, flat in '24.

Implied ~12x EV/fwd EBITDA, ~8x P/fwd AFFO

Macro softness leads to slower top-line growth: PF revenue bounces back less robustly than the base case in 2022, primarily driven by lower GDP growth and recessionary macro headwinds. Adjusted OIBDA growth solidly below the base case in 2022 and 2023.

Risk Reward – OUTFRONT MEDIA INC (OUT.N)

KEY EARNINGS INPUTS

Drivers	2021	2022e	2023e	2024e
Digital Billboards	1,401	1,584	1,689	1,801
Digital Transit Displays	12,610	17,029	24,029	31,029

INVESTMENT DRIVERS

- Growth highly correlated to macroeconomic growth trends
- Conversion of high occupancy traditional boards to digital
- Successful development of programmatic ad buying and improved measurement

GLOBAL REVENUE EXPOSURE

MS ALPHA MODELS

3/5	24 Month Horizon	4/5	3 Month Horizon
BEST	Horizon	MOST	Horizon

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Quintile

RISKS TO PT/RATING

RISKS TO UPSIDE

- Digital conversions grow above expectations
- Out-of-home advertising share growth significantly accelerates

RISKS TO DOWNSIDE

- Deterioration in macro outlook
- Rising interest rates without strong fundamentals
- · Failure to renew transit accounts
- Higher debt leverage vs. group
- Dependence on local advertisers (~55% of US revenue at time of last filing)
- Government regulation

OWNERSHIP POSITIONING

Refinitiv; MSPB Content. Includes certain hedge fund exposures held with MSPB. Information may be inconsistent with or may not reflect broader market trends. Risk Reward – Eventbrite, Inc. (EB.N)

Attractive growth outlook balanced by limited visibility into profitability

PRICE TARGET \$9.00

Our \$9 PT implies ~2.5x fwd. sales, consistent with where shares trade today.

Consensus Price Target Distribution \$9.00 \$18.00 MS PT Source: Refinitiv, Morgan Stanley Research ◆ Mean ◆ Morgan Stanley Estimates

RISK REWARD CHART

EQUAL-WEIGHT THESIS

We see an attractive growth outlook for Eventbrite, which we think should benefit from both reopening and a healthy underlying consumer appetite for live events and experiences. However, we see that outlook balanced by an evolving business model and uncertainty around marketing intensity required to drive sustained growth.

Source: Refinitiv, Morgan Stanley Research

Risk Reward Themes

Secular Growth: Positive

Source: Refinitiv, Morgan Stanley Research

BULL CASE

\$14.00 **BASE CASE** \$9.00

BEAR CASE

\$3.00

~4x fwd. revenue

In our bull case, we assume Eventbrite grows at a ~35% 3-year CAGR from 2022-24, driven by the tailwind from reopening in addition to even stronger underlying consumer demand for live events and experiences. Opex intensity moderates across R&D, S&M, and G&A, driving positive EBITDA (MS-defined) margins in 2025.

~2.5x fwd. revenue

In our base case, we assume Eventbrite grows at a ~30% 3-year CAGR from 2022-24, driven by the tailwind from reopening in addition to healthy underlying consumer demand for live events and experiences. S&M and R&D intensity moderate only slightly over that time frame, and the company is able to drive most operating leverage from G&A, driving roughly breakeven EBITDA (MS-defined) margins by 2026.

~1x fwd. revenue

In our bear case we assume Eventbrite grows at a ~25% 3-year CAGR from 2022-24, with a benefit from reopening but more modest underlying demand. S&M intensity rises over this time frame, as the company is required to spend more to drive creator and paid ticket growth. The company is able to generate limited operating leverage as a result, primarily from G&A, and pushing out EBITDA (MS-defined) breakeven significantly.

Risk Reward - Eventbrite, Inc. (EB.N)

KEY EARNINGS INPUTS

Drivers	2021	2022e	2023e	2024e
Paid Creators (000s)	276.4	341.7	393.0	432.3
Paid Tickets (000s)	67,427.0	92,722.7	120,493.2	139,169.6
Take Rate (%)	7.7	8.0	8.0	8.0

INVESTMENT DRIVERS

- Sustained creator growth, supporting paid ticket sales
- Driving take rate higher through ancillary services
- Sales and marketing intensity
- Technology / platform investment

GLOBAL REVENUE EXPOSURE

Source: Morgan Stanley Research Estimate View explanation of regional hierarchies <u>here</u>

RISKS TO PT/RATING

RISKS TO UPSIDE

- Reopening tailwinds are stronger than we estimate
- Eventbrite's platform is more differentiated than we estimate, limiting competition and leading to lower investment needs
- Creator and paid ticket growth occurs more organically, allowing the company to spend less on marketing

RISKS TO DOWNSIDE

- Underinvestment in platform/technology
- Higher competition, particularly in virtual events
- Macro/cyclical weakness

OWNERSHIP POSITIONING

Refinitiv; MSPB Content. Includes certain hedge fund exposures held with MSPB. Information may be inconsistent with or may not reflect broader market trends. Long/Short Ratio = Long Exposure / Short exposure. Sector % of Total Net Exposure = (For a particular sector: Long Exposure - Short Exposure) / (Across all sectors: Long Exposure - Short Exposure).

Risk Reward - Live Nation Entertainment Inc. (LYV.N)

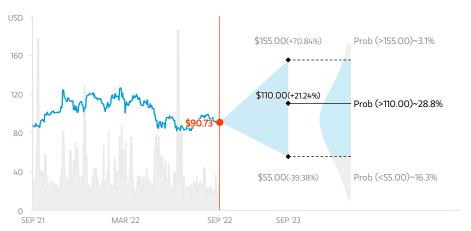

Believe in live entertainment long-term, but valuation full

PRICE TARGET \$110.00

Our \$110 price target is based on ~21x EV/fwd. EBITDA, in-line with high growth peers.

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 08 Sep, 2022. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology here

EQUAL-WEIGHT THESIS

- We see a strong recovery for live events, with Live Nation recovering to beyond 2019 levels in 2022
- Live Nation is well positioned to gain concert promotion share globally, both organically and through M&A, but the market may not be pricing in the cost of the company's M&A
- Live Nation can leverage the scale of its concerts to drive high-margin growth in both Ticketing and Sponsorship

Consensus Rating Distribution

Source: Refinitiv, Morgan Stanley Research

Risk Reward Themes

Secular Growth: Positive
Market Share: Positive

View descriptions of Risk Rewards Themes here

BULL CASE

\$155.00

BASE CASE

\$110.00

\$55.00

~22.5x EV/fwd. EBITDA

Elevated concert supply along with continued strong sponsorship demand and ticketing share gains drive continued above historical level growth in '23 and beyond

~21x EV/fwd. EBITDA

Touring in 2022 looks healthy with DD growth above 2019 levels across all segments. Together with a reduced cost structure this generates AOI well above 2019 levels.

~16x EV/fwd. EBITDA

BEAR CASE

The path of live event recovery occurs more slowly, particularly abroad, resulting in lower growth in 2022-24, though still exceeding 2019 levels in '22. Savings are partially offset by investment, but 2022 AOI remains above 2019.

Risk Reward - Live Nation Entertainment Inc. (LYV.N)

KEY EARNINGS INPUTS

Drivers	2021	2022e	2023e	2024e
Events	17,234	46,303	49,141	51,428

Growth in Fee-Bearing Tickets (%)	323.4	89.2	7.0	2.0

INVESTMENT DRIVERS

- Any change, better or worse, in consumer appetite to return to live events
- Meaningful change in growth of the overall music industry and live events
- Acquisition activity, and the perceived attractiveness of targets

GLOBAL REVENUE EXPOSURE

Source: Morgan Stanley Research Estimate View explanation of regional hierarchies <u>here</u>

MS ALPHA MODELS

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Quintile

RISKS TO PT/RATING

RISKS TO UPSIDE

- Accelerated international reopening and/or higher consumer appetite to return to live events
- Continued M&A that accelerates LYV's int'l growth and global fan base, at accretive multiples

RISKS TO DOWNSIDE

- Lower consumer appetite to attend crowded events, or new COVID outbreaks
- Slower than expected M&A and/or at unattractive valuations
- A decline in the ad market

OWNERSHIP POSITIONING

Risk Reward - Paramount Global (PARA.O)

Paramount Global Risk/Reward Outlook

PRICE TARGET \$20.00

Our \$20 base case price target for mid-'23 implies \sim 9x forward EBITDA and \sim 11.5x forward EDS

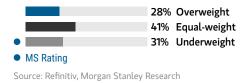

SEP '21 MAR '22 SEP '22 SEP '23

Key: — Historical Stock Performance • Current Stock Price • Price Target

UNDERWEIGHT THESIS

- We see opportunity for the direct-toconsumer business to scale and help mitigate pressures within the traditional media ecosystem over time but near-term we see linear pay-TV pressure getting worse and we see risk to near-term DTC estimates vs. consensus and company guidance.
- There remains limited visibility into DTC profitability long-term and near-term investment needs push any potential for EBITDA growth out to 2024.
- Higher likelihood of recession presents downside risk to near-term advertising estimates.
- We continue to view the Paramount film studio as a scarce, valuable asset.

BULL CASE

30

20

10

\$30.00 BASE CASE

\$20.00

\$9.00

~11x fwd. EBITDA, ~16.5x fwd. EPS

Source: Refinitiv, Morgan Stanley Research

Total DTC subs reach 100mm+ globally by YE24, in-line with the company's guidance, and helping drive consolidated subscription and affiliate growth at a 12-13% CAGR from 2022-24. Advertising grows at a ~3% CAGR. Consolidated revenue grows at a ~7% CAGR (2022-24), but ramping content investment drives EBITDA down DD over that time frame.

~9x fwd. EBITDA, ~11.5x fwd. EPS

\$20.00(-11.93%)

\$9.00(-60.37%)

Total DTC subs fall short of ~100mm globally by YE24, modestly below the company's guidance, and contributing to consolidated subscription and affiliate growth at a 10-11% CAGR from 2022-24. The company also is able to reach roughly 100mm Pluto MAUs by YE24 and drive a ~2% ad CAGR. Consolidated revenue grows at a ~6% CAGR (2022-24), but ramping content investment drives EBITDA down DD over that time frame.

~7x fwd. EBITDA, ~7x fwd. EPS

Total DTC subs fall short of 90mm globally by YE24 resulting in lower consolidated subscription and affiliate growth at a ~9% CAGR from 2022-24. Advertising grows at a ~1% CAGR. Consolidated revenue grows at a ~5% CAGR (2022-24), but content investment pressures EBITDA down midteens over that time frame.

Risk Reward – Paramount Global (PARA.O)

KEY EARNINGS INPUTS

Drivers	2021	2022e	2023e	2024e
Total Retrans Revenue (\$, mm)	2,620.5	2,716.5	2,806.7	2,896.5
DTC Subscribers (mm)	56.1	73.2	86.2	95.2
DTC Revenue (\$, mm)	3,327.0	5,068.5	6,797.1	8,378.7
Total Content Amortization (\$, mm)	14,703.0	16,617.1	18,373.9	20,205.6

INVESTMENT DRIVERS

- A weakening ad environment and/or more rapid deceleration in digital advertising (e.g., Pluto)
- DTC growth pacing below long-term guidance
- Limited growth or even pressure from affiliate/retrans renewals on rate and/or distribution

Morgan Stanley | RESEARCH

USA Inc, Amazon.com Inc, AMC Networks, Inc., Booking Holdings Inc, Charter Communications Inc., Cinemark Holdings, Inc., Clear Channel Outdoor Holdings, Inc., Comcast Corporation, eBay Inc, Electronic Arts Inc, Endeavor Group Holdings, Inc, Etsy Inc, Eventbrite, Inc., Expedia Inc., Fox Corporation, iHeartMedia Inc, Interpublic Group, Lamar Advertising Co., Liberty Broadband Corporation, Live Nation Entertainment Inc., Meta Platforms Inc, Netflix Inc, New York Times Co, Paramount Global, Playtika Holding Corp, RealReal Inc, Roku Inc., Sirius XM Radio Inc., Snap Inc., Spotify Technology SA, TRIVAGO NV, Twitter Inc, Uber Technologies Inc, Walt Disney Co, Warner Bros Discovery Inc., Warner Music Group Corp., World Wrestling Entertainment Inc, WW International Inc, Zillow Group Inc.

An employee, director or consultant of Morgan Stanley is a director of eBay Inc. This person is not a research analyst or a member of a research analyst's household.

Morgan Stanley & Co. LLC makes a market in the securities of Activision Blizzard Inc, Airbnb Inc, Alphabet Inc., Amazon.com Inc, AMC Networks, Inc., AppLovin Corp, Charter Communications Inc., Cinemark Holdings, Inc., Comcast Corporation, Criteo SA, Despegar.com Corp, DISH Network, eBay Inc, Electronic Arts Inc, Etsy Inc, Eventbrite, Inc., Expedia Inc., Fox Corporation, i-HeartMedia Inc, Integral Ad Science Holding Corp., Interpublic Group, Lamar Advertising Co., Liberty Broadband Corporation, Liberty Formula One, Lions Gate Entertainment Corp., Live Nation Entertainment Inc., Madison Square Garden Entertainment Corp, Madison Square Garden Sports Corp, Match Group Inc, Meta Platforms Inc, Mytheresa, Netflix Inc, New York Times Co, Omnicom Group Inc., OUTFRONT MEDIA INC, Paramount Global, Playtika Holding Corp, Poshmark Inc, Quotient Technology Inc., RealReal Inc, Roku Inc., SciPlay Corporation, Shutterstock Inc, Sirius XM Radio Inc., Take-Two Interactive Software, TRIVAGO NV, Twitter Inc, Walt Disney Co, Warner Music Group Corp., World Wrestling Entertainment Inc, WW International Inc, Yelp Inc, Zillow Group Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of August 31, 2022)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm. For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	COVERAGE UN	NIVERSE	INVESTMEN	T BANKING CLI	ENTS (IBC)	OTHER MA INVESTMENT : CLIENTS (SERVICES
STOCK RATING	COUNT	% OF	COUNT	% OF	% OF	COUNT	% OF

TOTAL	3,555		743			1537	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Morgan Stanley | RESEARCH

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Important Disclosures for Morgan Stanley Smith Barney LLC & E*TRADE Securities LLC Customers

Important disclosures regarding the relationship between the companies that are the subject of Morgan Stanley Research and Morgan Stanley Smith Barney LLC or Morgan Stanley or any of their affiliates, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to www.morganstanley.com/researchdisclosures.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC and E*TRADE Securities LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

Morgan Stanley & Co. International PLC and its affiliates have a significant financial interest in the debt securities of Activision Blizzard Inc, Airbnb Inc, Alphabet Inc., Amazon.com Inc, AMC Networks, Inc., AppLovin Corp, Booking Holdings Inc, Chewy Inc, Clear Channel Outdoor Holdings, Inc., Comcast Corporation, DISH Network, eBay Inc, Eventbrite, Inc., Expedia Inc., Fox Corporation, Integral Ad Science Holding Corp., Interpublic Group, Live Nation Entertainment Inc., Meta Platforms Inc, Netflix Inc, New York Times Co, Omnicom Group Inc., Paramount Global, Playtika Holding Corp, Roku Inc., Snap Inc., Take-Two Interactive Software, Twitter Inc, Uber Technologies Inc, Unity Software Inc, Walt Disney Co.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions. Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix. Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (http://www.morganstanley.com/terms.html). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use

(http://www.morganstanley.com/terms.html). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.
